The perceptual or psychological primaries are red, yellow, green and blue. Which we call them chromatic colors

Secondary colors orange, emerald-green and violet .They are named the monochromatic colors

.The tertiary colors are black, white and grays .They are named achromatic

.HUE is the name of the color

.Chroma: the degree of intensity, strength, saturation or purity of color

.Saturation= chroma: color intensity, weight or freedom from gray

.Value: Brightness or luminosity

Value

. = HUE

Chroma
