Dr. Najeh Hammaza Khalkal Al-Mamury
Vice-Dean of Administrative Affairs

Introduction:

College of Nursing was established in 2007 under the order of the Ministry of Higher Education and Scientific Research in 29/4/2007 and Dr Qahtan Hadi Hussein al-Juburi (Assistant Professor) was named as the Dean of the College. The College will produce a sample of students who are able to meet the requirements posited by the challenges of educational reality to develop and improve health situation for the individual, the family and the society. The College keeps pace with the changing health care needs and hopes to make drastic changes in the field. The College strives for achieving excellence in teaching, research, diverse schooling activities.

practice and community service through cooperation with the government and evaluation. The Dean sees that it is appropriate to help create and maintain an environment where every member of the College can succeed in his efforts. The College is equipped with laboratories and fine computer labs. We spend great efforts for producing a well-developed cadre who are successful in their nursing career all over the world .

- College of Nursing is a member in the Scientific Arab Association of Colleges of Nursing annexed to the University of Arab League at AL-Zeitoun University in Jordan.
- It is also a member of the Universal Nursing Council which is academically well-known in Japan .

Dean Message

Welcome to College of Nursing at the University of Babylon prospectus. I hope your visit will help you to know the programmes of study, staff, and students. College of Nursing is responsive to health care needs and it hopes to develop the roles of nurses within society demands through collaboration with professional associations, governmental and non-governmental organizations and other educational institutions. The College strives for excellence in teaching, research, diverse schooling activities, practice and community services. I am delighted that I am assigned to be the Dean of College of Nursing, I think it is a great responsibility and I hope that I could be competent enough to cope with it. The main goal is to qualify graduates who have already succeeded to serve healthy and sick people. As a dean,

it is my duty to help create and maintain an environment where every member of the College can be successful in his work. The College has modern laboratories and computer labs. We have spared no efforts for producing well- formed laboratories. We have determined to teach and train bachelors who are able to work in the field of nursing. Enjoy your visit to our guide and feel free to come and visit College of Nursing in Babylon| Iraq.

The Future Visions

- Supporting healthy life in the area.
- Giving the opportunity to the individuals to get their higher education in a higher and effective way.
- Developing graduates' skills and abilities to serve as nurses in local and governmental hospitals.
- Producing highly trained and qualified scholars in the science of nursing to get postgraduate degrees in the future.
- Promoting programmers of training and teaching coping with recent developments.

Objectives

The College aims to prepare a high qualified nursing staff in order to achieve the preventive, curative and rehabilitating services for the individuals, families and community.

- Preparing a nursing staff that is able to give the nursing care services for different age groups of society members, regarding the preventive curative and rehabilitate measures.
- Developing abilities of students and graduates to get the necessary scientific steps for practising the profession of nursing care.
- Qualifying the graduates and students to understand and apply the nursing services, nursing theories and other health sciences necessary for looking after sick and healthy people.
- Preparing a nursing staff to work and cooperate with the health teams in different health situations.
- Preparing a nursing staff that could plan and intervene with health system requirements at national and international levels.
- Training students to face and solve problems in the health system in Iraq.
- Preparing a nursing staff that can achieve scientific research to improve and develop the nursing profession in the future.
- Qualifying a nursing staff that can lead health teams during crises and emergency situations.
- Training a nursing staff that can train the nursing personnel with the preventive, curative and rehabilitating measures.
- Preparing a nursing staff that adopt and work under any situation inside and outside the country.

The message of the College

Learning is the spiritual experience in life and it could be a proof to somebody to know himself.

The message of the College to students is summarized as follows:

- Students have individual educational needs and special educational ways specified to them.
- Learning should give the student a variety of academic work and creative evolution through the learning process and a chance of mental growth.
- Teaching the students in a co-operative environment makes education and gaining of the principles and concepts easier. Besides, it is necessary for the trainees from the beginning to gain and learn how to take care through the practice perspective of the nurse. the message of the college that is connected to science and knowledge .
- Gaining sciences had done through the gradual learning from simple concepts to complex ones .
- Nursing learning happens in different areas .
- Nursing learning is done through the co-operative with patients and their families and the members of the health care team.
- Increasing the consciousness of community needs through the adoption of the nursing process to different responsibilities and jobs .

Services

Although the College was founded in 2007, but now it has wide relationships with the community through presenting some services as follows:-

- The College contributes in giving nursing care services to the individual, families and community.
- Students of the College contribute in health education for individuals, families and society.
- It contributes in EPI (expand programme of immunization) that is occasionally carried out by the Ministry of Health.
- It contributes in all conferences as a consultant for planning and evaluation of national health systems.
- It participates in following up graduates and offers refreshment courses in knowledge and practices regarding nursing and other sciences.
- It contributes in the scientific international conferences held by the World Health Organization (WHO), (UNICEF) and other organizations.
